Preface

This Research Report is published by the Institute for Peace Science, Hiroshima University in cooperation with the Department of the Peace and Conflict Studies, Fourah Bay College, University of Sierra Leone. More specifically, the research was conducted as part of the Grant-in-Aid for Scientific Research provided by the Japan Society for the Promotion of Science. This report is intended to explore peacebuilding issues in Sierra Leone with the interest in the principle of ownership of local society. The principle of ownership is one of the most important issues in any kind of peacebuilding. The editor hopes that this research report will enhance our understanding of the issue so that we can better implement peacebuilding activities in the future.
